

## Patent Lawyer Prince George

Patent Lawyer Prince George - Our Intellectual Property lawyers know that for many companies their intellectual property is their most important asset. Intellectual property is an important part in retaining and attracting market share. It defines your company in the market place, whether by way of patents which exclude competitors, trademarks that identify your products, or copyright that stops illegal replication of your intellectual assets.

We have years of skill in the effective resolution and practical management of intellectual property disputes at all levels of the courts. Our clients consist of different trades, from start-ups to global corporations.

The main concerns which our firms believe must be the client's goals and what is sensible to them from a business point of view. Each infringement on intellectual property rights will not in all instances warrant a court action. Intellectual property litigation is costly because of the complexity of comprehensive analysis of rights and the use of suitable professionals. Where infringement disputes are straight-forward and simple, disputes often can be resolved through negotiated settlements together with built in deterrence conditions. In situations where court action is necessary, we follow methods that match a business-oriented method.

Our company and its lawyers are really skilled and experienced in representing our clients in claims of intellectual property infringement. Our well-known litigators have the skill to communicate to the courts the technical issues involved, whether you need defending against allegations of intellectual property infringement, or you are an owner of intellectual property pursuing infringers. We give legal recommendation and representation in disputes related to copyright, patents, trademarks, trade secrets, domain names, industrial design, interlocutory injunctions ("emergency" relief from infringement until trial) and Anton Pillar Orders (civil search and seizure orders).
