

Prince George Patent Lawyers

Prince George Patent Lawyers - Our firm leads the way in intellectual property law. We have an Intellectual Property (IP) Group with a wide range of technological skill specializing in the protection, use, exploitation and development of intellectual property and information technology.

Our team is knowledgeable and experienced at registrations, patent applications and trade-mark applications. Our members have helped with numerous industrial design applications and registrations.

To provide useful legal recommendation on numerous complicated IT issues, various scientific skill and a legal background is considered necessary. Our professionals have made the deepest research in these sciences. Some have engineering degrees while others have graduate degrees in the areas of biotechnology, chemistry, physics, electrical engineering, electronics and engineering physics. Among our group are members with doctoral degrees in nutrition and metabolism, applied chemistry, analytical chemistry, genetics, plant biogenetics, telecommunications, and oncology. Advanced scientific backgrounds combined with considerable skill at the bench equip our scientific experts with excellent skills and expertise.

The Industry

Intangible property could be the most valuable property in various businesses and research organizations. The control of this essential intellectual property requires the acquiring of effective and cost-efficient protection. Cultural industries, technology and telecommunications are vital to the nation's economic growth and health. In order to guarantee continued economic success, companies must have a well-developed intellectual property strategy.

As the trend to protect research outcome prior to public dissemination grows, access to the rights of others through cross-licensing or licensing-in is a primary concern. Flexibility is hence in a position in intellectual property rights to serve the dual purpose of providing an asset used to add revenues through licensing and to secure a niche market. A research-oriented or start-up organization could achieve significant advantages by combining intellectual property assets through cross-licensing with those of a large global corporation.

Protecting Intangible Assets

For various businesses in today's competitive conditions, intangible assets like for instance brands, trade secrets, and goodwill are often at the heart of commercial success. Thus, protecting intangible assets, which can consist of a significant portion of their value, is an essential approach to business.

Inter-disciplinary Approach

Our inter-disciplinary approach allows us to provide a full range of services. We are well positioned to provide knowledgeable and up-to-date recommendation both to companies in the area of technology and to those affected only incidentally by new technological developments.

We work closely together with experts in the areas of human resources, banking, capital markets; litigation, tax, employment law; and mergers and acquisitions. Our regular participation in client specific teams ensures that our clients have the scientific and legal support needed for complex intellectual property management and protection problems, as well as commercial transactions, including the establishment of strategic alliances, outsourcing agreements, and initial public offerings in telecommunications, biotechnology, and various technology sectors.
