

Criminal Law Firms in Prince George

Criminal Law Firms in Prince George - Our Intellectual Property & Technology Practice offers various services to clients about all aspects of intellectual property law. This includes industrial designs, copyrights, trade-marks, licensing, confidentiality, trade secrets, biotechnology, software, and various technology problems. We are proactive in our method to offering timely solutions to clients' problems.

We provide our services to a lot of clients from both the private and public sectors. Our passionate business clients care about the innovative products and services, providing the creative energy to be successful. They come from diverse fields like the software, music, film, service, manufacturing and travel trades. Our company provides complex legal services and tools meant to protect and secure our clients' products and services. When clients have global issues, we work extensively with foreign legal counsel to provide solutions.

To solve the various technological and business issues, our firm seek to apply innovative approaches. We keep up with all the latest trends in technology and emerging media, to alert our clients to any likely legal impacts. To be able to ensure various legal services are accessible to our clients, our lawyers form client teams along with other lawyers, when appropriate.

Copyright

The members of our practice provide professional recommendation concerning international copyright conventions and copyright legislation. Copyright holders will receive advice regarding enforcement and infringement. We likewise draft and review license arrangements, and assist with the registration and protection of clients' copyright both locally and worldwide.

Trade-marks

As registered Trade-mark Agents, we prosecute and prepare trade-mark applications, carry out trade-mark and name searches, represent clients in trade-mark litigation, get pre-clearance and clearance both nationwide and globally, and carry out trade-mark licensing. To help our clients who are involved in mark arrangements and globalized name; we draw upon established relationships with a broad network of trade-mark agents. This would help to ensure a smooth delivery on an inter-jurisdictional basis. Clients receive assistance in the resolution of disputes and the enforcement of trade-mark right in the courts and administrative forums.

Technology

We have clients involved in commercializing and developing new software and other innovative services and products. Our services assist both established and emerging and new companies and organizations in the following fields: pharmaceuticals, nutraceutical, hospitals, biotechnology; video game development and publishing; and software publishing and design. Our technology professionals advise clients on issues like for example the Internet and e-business, the use of "open source" code, technology transfers, system acquisitions, licensing, technology aspects of commercial transactions and mergers, joint ventures, distribution agreements, corporate financing and structure, as well as strategic alliances.

Patents

The members in our practice provide practical legal suggestion to clients on contractual problems related to patents, such as the licensing and acquisition of patent rights.

Industrial Design

We have design experts to help our clients in the preparation and prosecution of industrial design registrations in Canada. Right referrals to U.S. agents in connection with design patents in the U.S. could even be offered.

Litigation

We even litigate for our clients in issues regarding disputes involving industrial design, copyright, licensing, confidentiality agreement, passing off, trade-marks, patents and trade secrets.
