

Divorce Lawyer Prince George

Divorce Lawyer Prince George - When dealing with separation or divorce, it is really simple to get overwhelmed. The division of property and potential child/spousal support and access along with the emotional stress and burden could make it a very traumatic event. Because the choices made during this particular time can have an effect on the rest of your life, it is sensible to have an impartial party present who can make certain you are provided as much data as possible regarding the consequences of your decisions.

There are various ways so as to resolve family problems, including collaborative family law, the Court process, mediation, and negotiation.

Our firm believes that whatever marital problems must be resolved outside the courtroom. This saves money and is most likely the most efficient way. A fair, written agreement can be reached by our experienced lawyers via negotiation.

If for whatever reason you cannot prevent going to court, we can help provide you with knowledgeable and experienced representation.

All through "Collaborative Family Law", each spouse hires a lawyer especially trained in collaborative law. Each party and their lawyer agrees that they will not go to court and sign a contract stating they will attempt and settle the issues through negotiation. Nearly all of the work is spent with both parties and their lawyers present and negotiating between themselves.

Clinical Counselors or Registered Psychologists could be included in the proceedings, that depends upon the requirements of the family. Should the case need it, we also encourage utilizing a child specialist in order to assist arrange a parenting plan along with helping with whichever issues concerning the mental well being of the children.

When undergoing divorce, the collaborative family law is unique in that it enables the parties to come to a resolution themselves. We offer professionals to help ensure that the separation goes as smooth as possible, and to be able to help handle the extreme emotional feelings experienced during the procedure.
